EDUCATION

Washburn University

Bachelor of Science in Computer and Information Sciences

Expected Dec 2026

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, HTML, CSS

Web & Frameworks: React.js, Node.js, Tailwind CSS

Databases: PostgreSQL, SQL Server

Microsoft & Cloud: Azure DevOps (Boards), Microsoft Purview, Azure Databricks, Power Apps, Power BI, Visual Studio

Tools, APIs & Methodologies: REST API, Microsoft Graph API, JWT, Git, GitHub, Supabase, Render, PowerShell, Agile

PROFESSIONAL EXPERIENCE

Data Intern

May 2026 – Aug 2026

Office of Information Technology Services – State of Kansas, Topeka, KS

- Developed a **Data Asset Documentation Toolkit** that standardized data governance practices and improved consistency in data documentation.
- Built a semi-automated **enterprise architecture approval and reporting framework** using Python and Power Apps to streamline KARS-related workflows.
- Prototyped a **local LLM data-extraction workflow** in Python using Ollama to identify keywords from large unstructured text fields and support data mapping between enterprise systems.
- Served as a team lead, coordinating project activities, communicating progress, and helping maintain on-time delivery.

Data Management and Analytics Intern

May 2025 – May 2026

Federal Home Loan Bank, Topeka, KS

- Developed Python automation using **REST APIs, Microsoft Graph API, JWT-based authentication, and Excel integration** to automate metadata updates in Microsoft Purview, achieving 95%+ metadata accuracy.
- Collaborated with **data engineers and cross-functional teams** to identify data-quality issues and improve data processing through pipeline optimization and workflow automation.
- Built a Power BI dashboard to monitor metadata quality and status across production datasets.
- Worked within an **Agile environment** using Azure DevOps Boards to manage sprint tasks, priorities, and project progress.

PROJECTS

Auctora

Developer and Designer | React.js, Node.js, Supabase/PostgreSQL, Render, Tailwind CSS

- Built and deployed a full-stack auction platform** with real-time bidding, user authentication, and cloud deployment using React, Node.js, Supabase/PostgreSQL, and Render.
- Designed Supabase/PostgreSQL backend with Row Level Security, automated triggers, and API integrations, to manage application data and access control.
- Developed the React-based frontend and integrated it with backend services and database functionality to create end-to-end application workflows.

Plexi

Designer and Developer | HTML, CSS, JavaScript, SQL

- Developed a web platform connecting users with freelancers through structured task-posting and outsourcing workflows.
- Designed and implemented application interfaces and database-backed functionality using JavaScript and SQL.
- Secured \$4,000 in combined project funding through the Community Innovation Challenge and Student Business Accelerator Fund.

SABASTIAN

Engineer | Python, NLP, Sentiment Analysis, Rule-Based Systems

- Developed a Python-based conversational application using NLP, sentiment analysis, sarcasm detection, and rule-based dialogue processing.
- Designed modular dialogue components to improve maintainability and support expansion of conversational functionality.
- Implemented adaptive response logic to improve contextual relevance based on user input.

HONORS & AWARDS

- President's List** (Washburn University), **Dean's List** (Washburn University)
